

# Decision Analyst Economic Index United States Census Divisions

June 2017

Arlington, Texas—The Economic Indices for the U.S. Census Divisions have increased or stayed the same in the past 12 months. The West South Central has the highest score of all the Census Divisions, with an Index score of **117 for June 2017**, and has the largest increase over the past 12 months, increasing 10 points. The East North Central had the lowest Index score, **110 for June 2017**; however, it still increased 4 points over the past 12 months.

\* The Index numbers for the Census Divisions are 3-month moving averages to smooth out fluctuations due to smaller sample sizes. The reported Index number averages the current month with the previous 2 months.

## United States Economic Index

The Decision Analyst U.S. Economic Index stood at **115 in June 2017**, a 1-point increase from its May 2017 level of 114 and a 6-point increase from its June 2016 level of 109. The overall slope of the Economic Index over the past 12 months is generally upwards, reaffirming that the U.S. economy is likely to expand throughout 2017. The Economic Index tends to lead U.S. economic activity by 6 to 12 months. Below is the past-10-year history of the U.S. Economic Index.

### United States Economic Index June 2017

**Past-12-Month  
Change**  
(From June 2016  
to June 2017)

“The U.S. Economic Index is up 6 points over the past 12 months, an indication of moderate economic expansion and an indicator of continued GDP growth throughout 2017,” said Jerry W. Thomas, President/CEO of Decision Analyst. “The greatest risks to the overall U.S. economy during the next 12 months are a stock market crash (it’s overpriced), uncertainty related to the Trump administration in Washington, the possibility of trade wars or trade disruptions, and the possibility of U.S. political or budget crises. The positive forces for future expansion of the U.S. economy are growth in the world economy (especially the European economy), continuing low energy costs, relatively benign inflation, and a likely increase in spending on capital investments by major U.S. corporations.”

## History

The division-by-division results are presented in the following graphs. Remember, the Census Division graphs portray 3-month moving averages.

June 2017)

**+6  
Points**

*Pacific Census Division  
includes Alaska,  
California, Hawaii,  
Oregon, and  
Washington*

### \*Three-Month Moving Average

The Index numbers for U.S. Census Divisions are 3-month moving averages to smooth out month-to-month fluctuations. The reported Index number averages the current month with the 2 previous months.

### Methodology

The Decision Analyst Economic Index is based on a monthly online survey of several thousand households balanced by gender, age, and geography. The scientific survey is conducted in the last 10 days of each month. The Economic Index is calculated from 9 different economic measurements using a sophisticated econometric model. The result is a snapshot of coming economic activity in each country surveyed, as seen through the eyes of representative consumers living in the respective countries.

Decision Analyst conducts its concurrent economic surveys each month in Argentina, Australia, Brazil, Canada, Chile, Colombia, France, Germany, India, Italy, Mexico, Peru, the Russian Federation, Spain, United Kingdom, and the United States. Whenever the Decision Analyst Economic Index is greater than 110, it tends to signal an expanding economy. An Index value of 90 to 110 suggests a no-growth or slow-growth economy, and near or below 90 generally indicates economic contraction. These guidelines vary by country, however.

### About Decision Analyst
